

Grace / Final Project

Mobile Design

Navigation Guide

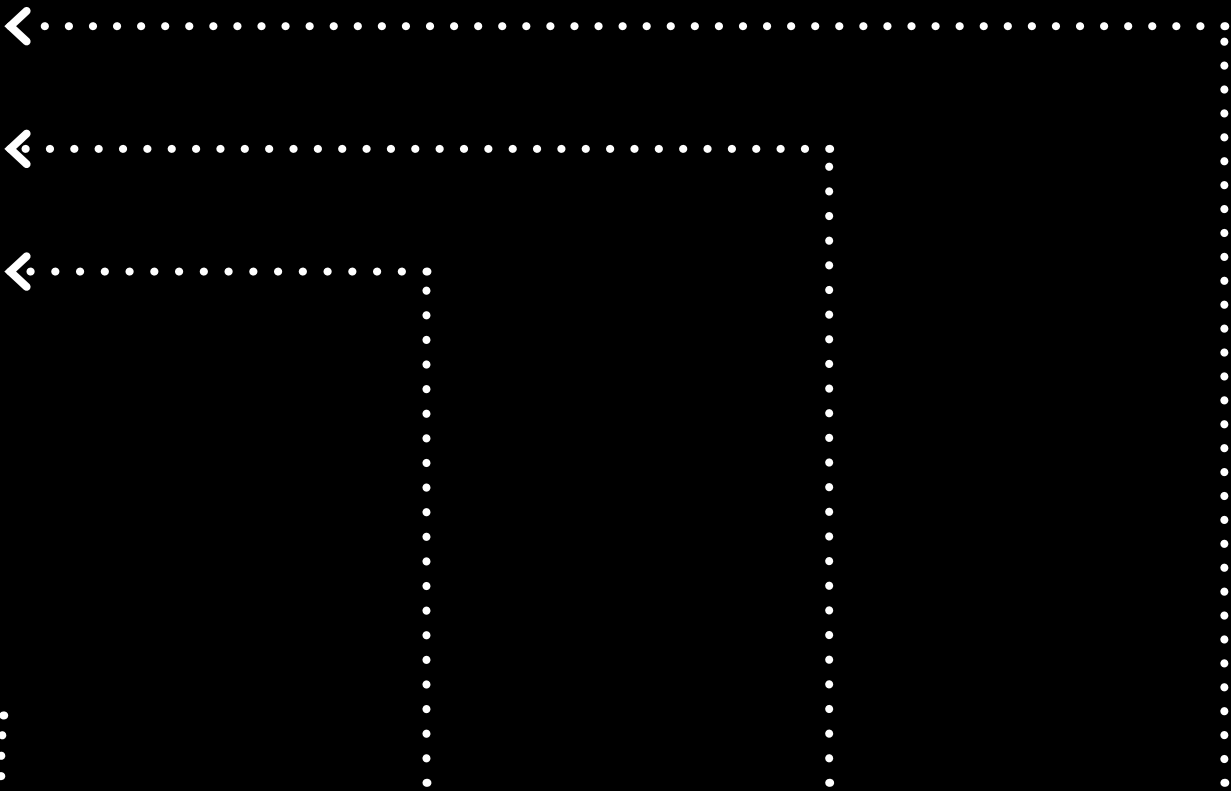

Landing Page

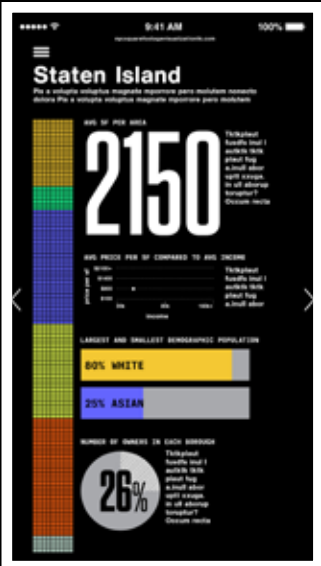

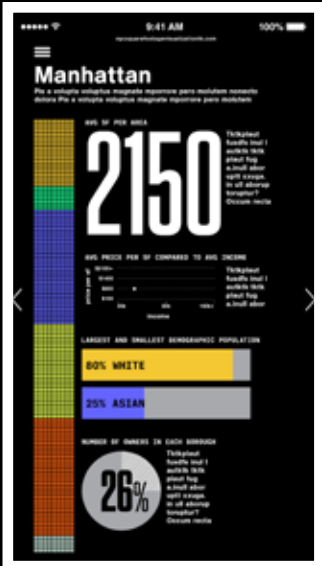

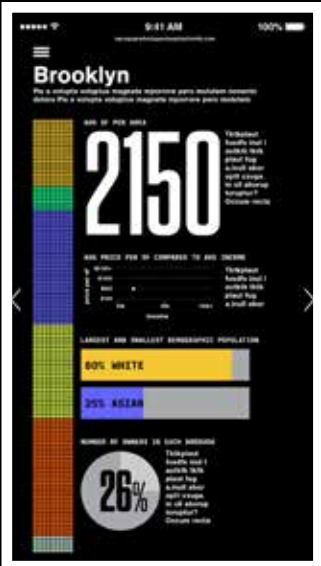

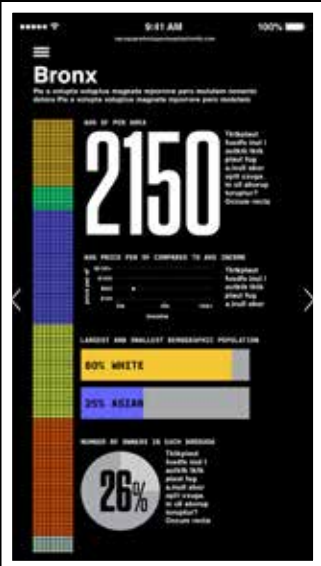

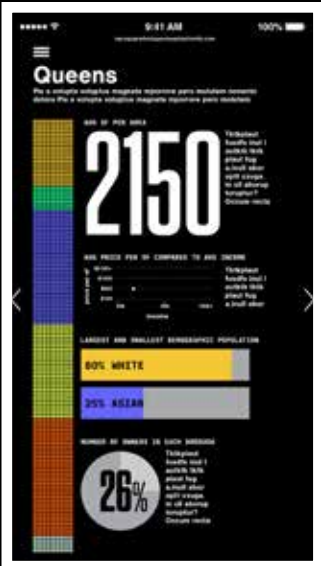

Viewer swipes down, eventually reaching the first borough analysis, which is Queens

Menu Popup

The menu bar is on the top left of each screen

A menu bar will be available on the top left of each slide, providing the viewer options to either go back to landing page or jump to other borough analysis

In the borough slides, a viewer will be able to swipe between slides from left to right. Swiping left will ultimately take you back to the landing page. When a viewer swipes right on the last borough (here, Staten Island), it takes the viewer back to the first slide (Queens).

BOROUGH COMPARISON

INSIDE
NEW YORK
CITY
LIVING

A visualized breakdown of how much living square footage space exists in all of NYC and how demographics, price per square foot, and income vary from borough to borough.
